

Field Trip Files

Emerging Order, 10/26/05

Organization

In your field trip work group, organize and sort the digital files you collected. You can work across adjacent computers to make the process go faster.

1. Download your Group folder from Masu.
2. Within that folder, create subfolders:
 - Scavenger Hunt
 - Audio
 - Video
 - Other Projects
3. In the Scavenger Hunt Folder:
Create four sub-folders:
 - Symmetry
 - Growth Patterns
 - Fibonacci Life Forms
 - Inanimate Order

Go through the collection of photos and sort them according to folder.
For Scavenger Hunt images, re-label each image with what the object is and the initials of the person who took the picture (i.e. "starfishRH.jpg")

4. For pictures documenting tide markings, labyrinths, golden spirals, etc., label those with the name of the assignment and a number if there is more than one of them (i.e. "labyrinth3.jpg") and put them into the Other Projects folder.
5. In the Audio folder, create a subfolder with the first name and initial of last name of each member of your group. For any flash recorder files, and/or when you transfer tracks from mini-disks to the computer, label each one according to its content, and the number of the take in cases where there are more than one ("dynamic3.wav" or "dynamic3.aif").
6. Place time-lapse and stop-motion footage files into the Video folder.

Selection

On Thursday we will screen each group's time-lapse and stop-motion footage and some of the digital photos.

1. From all your work, collectively choose 6 images to show the class. Make copies of those images and put them in a new sub-folder "Presentation." Write a brief description of each, including why it was chosen and what it represents.
2. Make copies of the time-lapse and stop-motion footage and put them in the Presentation folder. Write a brief description of the footage including the group's original intent for shooting, what worked or didn't work, and other information such as frame rate for time-lapse.

These written descriptions are notes for when you present the work to the class, however, make a Word doc of the descriptions to include in the Presentation folder.
