

Biology Homework Set 4

Make a ONE-TWO page study guide (typed) highlighting the key concepts presented for:

- A. Chromosomal Theory of Inheritance and Linkage
- B. Extensions of Mendel's Model
- C. Population Genetics, Hardy-Weinberg
- D. Types of Selection
- E. Mutation, Migration, Genetic Drift and Inbreeding
- F. Sexual Selection
- G. Misconceptions about Evolution
- H. Speciation

As you are creating your study guide, underline the concepts that you find the most difficult to understand or use.

Prior to handing in this study guide, place a star next to the underlined concepts that you feel you have mastered.
