

Your assignment is to write and L^AT_EX a short yet creative article about any interesting mathematical fact (real or imagined!). Your document should include a title, at least two sections and a subsection, a list, a quote, some formatted mathematical equations, some **bold face**, some *italics* and a bibliography with two (optionally fictional) references which are cited in the text. The article should fit on one page!

There is an example TeX file in the handouts section of the CAL file space on Masu.

Save your paper using the naming convention:

`LaTeX_Paper_1_Lastname_Firstname.tex`

Create a PDF output file. Drop the PDF file and the TEX file into the dropbox.
