Culture as History

Education

Western Washington University: MS in Mathematics, 1990

Evergreen: BS, 1988

Teaching

Allen has been teaching at Evergreen, first as an adjunct, then as a regular member of the Evening and Weekend Studies planning unit since 2000. Before then he taught at Olympic College in Shelton, South Puget Sound Community College, Green River Community College, Highline Community College, and Bellevue Community College. He earned an Exceptional Faculty Award at Olympic college and was nominated at Green River Community College for an Exceptional Faculty Award.

Professional

While at Evergreen, Allen has organized Mathematical Association of America problem-solving groups on two separate occasions. He is a regular contributor to the problem sections of all major MAA publications and has had numerous solutions recognized and published.

Allen was a guest lecturer at Evergreen in 2000 and presented his research results on the converse of the mean value theorem.
