

A graybeard speaks...

BDEI

December 2004

Communication

- Enabling collaboration (human-centeredness)
- Trustworthiness (ontology)
- Good enough data sharing (data integration)
 - Duncker-Gassen
 - Machineries of difference

Lost in the infrastructure

- Coupling diverse models (modelling and simulation)
- Second and third generation metadata (data quality)

Social Science

- Indigenous/local/community knowledge (data integration)
- Ethics of decision making (data integration)
 - Values in design
- User needs (the futures market)

Infrastructural studies

- Research of interest for all (ontology)
- The big question

And, in the end, the world you make
is equal to the infrastructure you
design
