

## **RESEARCH AMBASSADOR APPLICATION FORM**

The Research Ambassador Program (RAP) was initiated in 2002 to explore ways to reward academic scientists to do outreach to non-scientific audience. The emphasis of the RAP is on non-traditional audiences, i.e., those who might not be inclined to engage in traditional informal science education institutions or programs. We welcome scientists from all levels of academia and from all fields of science.

Please fill in the application and return it by mail or email to the contact below.
